# PERFORMANCE

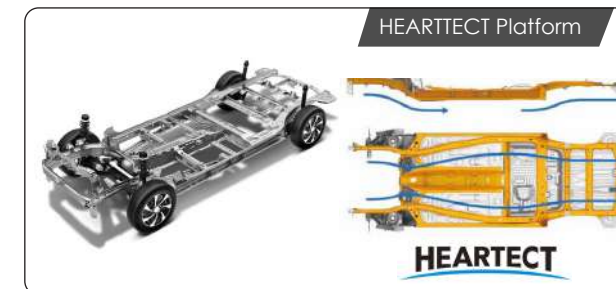

HYBRID

## Fuel efficient K15B engine with Suzuki's Hybrid technology.

The Hybrid system recharges the battery with electricity generated by deceleration energy, stops unnecessary power generation during cruising, and reduces engine load during fuel consuming standing starts and acceleration. It saves fuel while delivering spirited response.

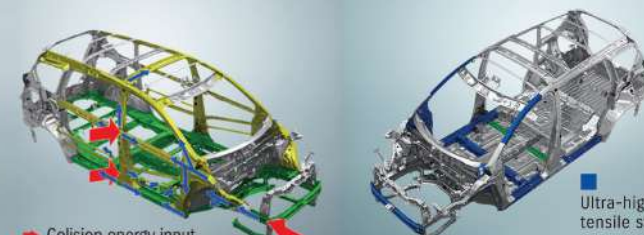

In addition, it comes with Engine Auto Stop Start System (EASS) which automatically turns off engine when the vehicle stops, and electric motor smoothly and silently restarts the engine when you press the accelerator pedal, further improving fuel economy and reducing emissions.

- Disperses energy more efficiently for greater collision safety
- Lighter weight contributes to lower fuel consumption.
- Reduce noise and vibration
- Improve driving dynamics

# SAFETY AND SECURITY

## Total Effective Control Technology (TECT)

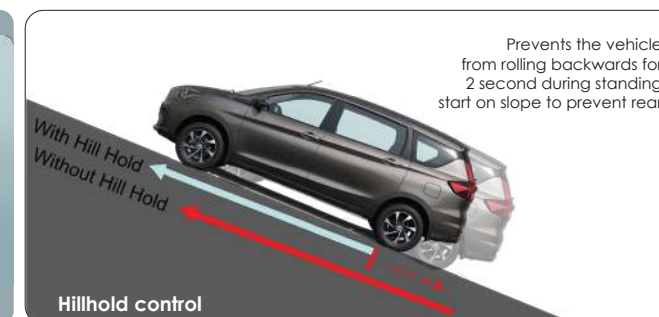

Effectively absorb and disperse energy upon collision

## SRS Airbag

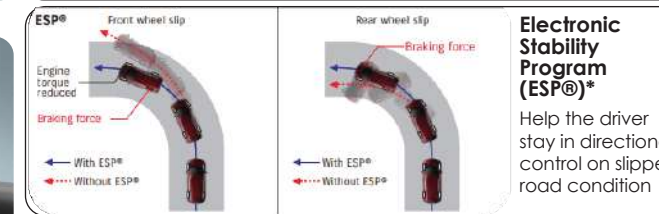

Effectively absorb and disperse energy upon collision

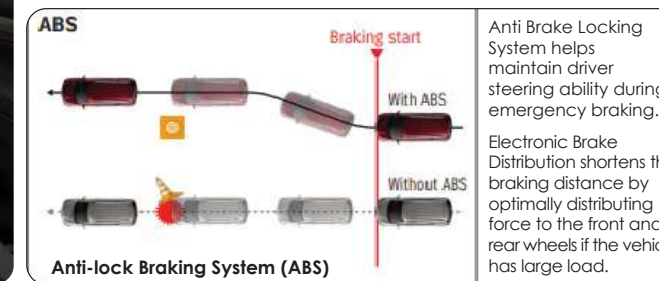

Hillhold control

Prevents the vehicle from rolling backwards for 2 second during standing start on slope to prevent rear

## Electronic Stability Program (ESP®)\*

Help the driver stay in directional control on slippery road condition

Anti-lock Braking System (ABS)

Anti Brake Locking System helps maintain driver steering ability during emergency braking.

Electronic Brake Distribution shortens the braking distance by optimally distributing force to the front and rear wheels if the vehicle has large load.

1. Impact-absorbing wiper system
2. Impact-absorbing cowl and cowl top
3. Impact-absorbing bonnet hinges
4. Impact-absorbing bonnet
5. Impact-absorbing bumper

Pedestrian injury mitigating body  
Helps mitigate head and leg injury in the event of a collision with Pedestrian

Door Activated Security Alarm provides reassurance when parking at night or deserted parking lots.
